## K30 VARIO AIR RECOMMENDED SPARE PARTS LIST

AMOUNT	DESCRIPTION	ARTICLE NUMBER
1	Hopper complete with Lid	309559
1	Power board K30 ES UL/CE 230 V, service pack	101655
1	Running capacitor 10 µF (200 - 230 V / 50Hz	305743
1	Processor board UL/CE, service pack	308389
1	Burrs set EK11 - K30 Vario	306715
10	Silicone flapper EK11b: silicone flapper Ø15,8 mm	101518
	EK11b: silicone flapper Ø17 mm. Valid from serial no. 523569	310139
1	Display K30 Vario	307244
1	Micro switch, service pack	306720
1	Rocker switch knob, service pack	306722
1	Portafilter mounting	306307
1	Flat spring EK11a, Service Pack (pack of 5)	310520
1	Grind adjustment key K30 Vario	306590
1	Tool for disc change in EK11b, built in grinder	101066
1	Circuit Breaker CBE-4A, service pack	309551
1	Small parts set, grind adjustment cover K30 Vario	308387
1	Fan 4028X. K30 Air assembled with cable	102115
1	Board for temperature control for fan 12 V/0,5 A incl. cables	101784

## K30 VARIO AIR BASIC STOCK PROPOSAL CLEANING PROCESS

---

### 1. CLEANING:

Always unplug the coffee grinder before cleaning.

- Apply dry cleaning only. If necessary use suitable mild „dish“ washer detergent
- No alkaline cleaning agent must be used for cleaning (affects-flavour)
- Do not spray coffee grinder with water and/or steam (risk of short circuit)
- Clean your grinder periodically, at least once a week.
- Please use MAHLKÖNIG GRINDZ™

#### Cleaning of housing:

- Use paper towel along with mild dish washer detergent to clean the housing, cover lid and inside the hopper

#### Cleaning of spout tube:

- Use a vacuum cleaner to exhaust the discharge tube. The use of brushes can lead to the damage of the built-in flappers resulting in an inaccurate grinding result.

Periodic checking of the grinder, burrs and grinding quality must only be performed by competent service personnel and/or trained staff.

### 2. ROUTINE CHECK:

#### Indications:

- Reduction of the output of the grinder.
- Temperature increase of the ground coffee
- Inconsistent grind
- Increased amount of dust
- Grinder clogs more often

### 3. MAINTENANCE:

#### Short-term maintenance every 2 weeks

- Outside cleaning including the hopper
- Use GRINDZ™

#### Long-term maintenance once a year

- Thorough cleaning of the grinder including the opening of the grinder housing and removing of all coffee residues
- Change of burrs
- Checking calibration and re-calibrate, if necessary
